

Library Research Day 2

Today, please identify at least two MAJOR problems your country is facing. If you are having difficulty determining what a “major problem” is, please reference your handout entitled “Ranking of the World’s Problems.”

For each of the problems, answer the following questions on a separate piece of paper. This will be turned in next week:

1. Define the problem.

2 Describe the impact this problem currently has:

- Who is affected by the problem?
- How does it negatively affect these people?
- Is the problem, national, regional, or global? (How does it affect other peoples?)

3. Explain what previous action has been taken:

- How successful were the efforts?
- Why were previous efforts unable to solve the problem?

4. Describe at least two (2) possible solutions that could be developed to address this problem.

- These solutions MUST be realistic.
- They may or may not have been tried yet. If they have been tried before explain why you think it will be successful if tried again.
- Please give FULL explanations in this section.

5. Detail the BEST solution:

- Choose the very best solution to each of your countries problems.
- What regional or international organizations and help with the solution?
- Describe the solution in detail and defend the strength of your proposal (argue why it will work).
- Does the proposal have benefits for other countries in the region?
